## Getting Started:

1. Buat database dengan nama "taskmanager".

2. Buka "Visual Studio Code" lalu buka panel "Package Manager Console", lalu jalankan command "Add-Migration initTask".

3. Setelah proses migrasi selesai jalankan command "update-database".

4. Jalankan program lalu buka webside dengan alamat url <a href="https://localhost:44377/">https://localhost:5001/</a>

Task	Manager				
Task data	collection table here eac	h row represents an individual task,	and columns display various a	ttributes or properties of	the tasks.
